

DESIGNING FOR CURIOSITY

ATLS 5519-005

Tues 3:00-5:30pm

This Fall 2017 semester, participants in the Designing for Curiosity class will learn design methods and relevant knowledge in a broad spectrum around curiosity. What is curiosity? What are we curious about? How can we arouse curiosity?

The intent of this course is to introduce fundamental design methods that can be applied to students' further practices across various design disciplines. Students will gain knowledge and experience on how to observe, think critical questions, and find design solutions understanding trade-offs.
