# CAN TECHNOLOGY END POVERTY?

## **ATLS 5230: Case Studies in Technology for Development** **Wed: 4 - 6 30 pm**

This course will examine how technology can be used to create social impact, through the lens of successful (and not so successful) development projects, policies, and technologies. In addition to reading and analyzing a variety of case studies covering diverse development sectors such as health, education, water and sanitation, etc., students will have the opportunity to implement and experiment with the various technologies and platforms discussed in these case studies.
