MACHINE
LEARNING

**FOR customizable &
expressive interfaces**

taught by

DR. BEN SHAPIRO

Assistant Professor of Computer Science

**ARE YOU
READY TO**

Apply machine learning to develop customizable human-computer interfaces like never before? Learn to process all kinds of data—video, accelerometer streams; you name it—using different machine learning algorithms to detect semantically meaningful events, allowing you to create crazy-cool, substantial and creative projects.

LECTURE: W 12:00–12:50PM, FLMG 156
recitations ATLS 1B25 | Fri. 9–10:40am | Fri. 11am–12:40pm | Fri. 1–2:40pm
