Course Name: Microcontroller Adventures
Course Number: ATLS 4519-100/101
M/W 11:00-12:50

Learn about chipsets and microcontrollers!

Delve into:
- various feature sets
- wireless capabilities
- manufacturing preferences
- what chip to choose for what application

Harness the power of knowing what lies beyond Arduino.

*Prerequisites:
Any physical computing course in any department, such as Object in ATLAS. This class will assume you have previously worked with Arduino and have coding skills.
