

# CAPSTONE 1

## Spring 2019 | Instructor: Danny Rankin

Capstone 1 lays the foundation for the culminating work in the TAM major. In this course, students will research precedents and domains for further project development, utilize effective design processes, refine presentation skills, and engage in iterative making and critique of each other's work. The Capstone 1 semester is focused on research and prototyping, and Capstone 2 is dedicated to executing a semester-long project based on this research.
