SEARCH INFORMATION IN THE DIGITAL AGE

ATLS 3519-001 / FALL 2014
INSTRUCTOR: ALICIA GIBB
TIME/DAY: 3:00–3:50 / MWF
LOCATION: ATLS 100
REGISTER THROUGH MYCUINFO

COURSE DESCRIPTION:
How do you know that everyone on the Internet isn’t a dog—or cat? What is the proper way to cite a lolcat meme in a research paper? What data is being collected about you? (Spoiler: all of it!) Information overload got your tongue?

This course will not only look at how searching for information has changed due to the Internet, but how society has changed, what happens to digital time and space when we parallel it to railroads, and why the Internet reflects properties of teleportation. Improve your information seeking skills, make some lolcats, and learn how to manage your data on everything digital. This course will teach you how to filter, find and critically evaluate the information that you need.

This course has no pre-requisites.
This course fullfills the TAM Critical Thinking in Technology elective requirement.
This course is open to all CU Boulder students.
